

# Bookkeeping

LHCb week 23 February 2000

•  
•  
•

# Current activity

- ◆ Tables in the ORACLE database are built
- ◆ Every day , we “transport” the OLD database in the NEW database format
  - We fill only the field which are in the current database
  - Put default value for the other fields

• • • • • • • •

•  
•  
•

# New procedure

- ◆ In parallel, we have modified the last operation of the production job to fill automatically the NEW database at the same time that we update the current one.
- ◆ Procedure public since one week.
  - We try to understand all the problems that we could find during the direct update

• • • • • • • •

•  
•  
•

# Access to the NEW database

- ◆ All the information available in the NEW database are accessible on the web through the URL :

[http://oraweb01.cern.ch:9000/lhcbmc/owa/book\\_procedures.general?procname=init](http://oraweb01.cern.ch:9000/lhcbmc/owa/book_procedures.general?procname=init)

Or From the LHCb Web home page / Computing / MC bookkeeping / prototype

•  
•  
•

# Next steps

- ◆ Try to understand how SICB use the current database to determine the overhead to switch to NEW database
- ◆ Study how to implement the bookkeeping in GAUDI.
