

Postdoctoral position at LHCb

Santiago de Compostela – Galicia - Spain

The Experimental High Energy Physics group in the *Instituto Galego de Física de Altas Enerxías* (IGFAE) at the University of Santiago de Compostela (USC), seeks candidates for a post-doctoral Research Associate position to work on the LHCb experiment at CERN's Large Hadron Collider.

The successful candidate will perform data analysis and will contribute to the successful operation of the LHCb detector.

Candidates for the position must have a PhD or equivalent in experimental high-energy physics.

The ideal candidate will also have:

- advanced programming skills with C++ or Python languages.
- experience with data analysis in high energy physics.
- the capability for effective scientific communication.

The position is available to start in September 2024, and is for one year initially, with the possibility of renewal based on satisfactory performance. The primary place of work will be Santiago de Compostela, with travels to CERN and conference meetings as needed.

Candidates should submit an academic CV and a short Statement of Research Experience and Interests. They should also arrange for two letters of recommendation to be sent directly to Dr. Antonio Romero (antonio.romero@usc.es) and Prof. Abraham Gallas (abrahamantonio.gallas@usc.es).

Review of applications will begin 1st of July 2024 and will continue until the position is filled.
